

The Power of Thoughts

POWER OF THOUGHTS CHAPTER 1

By: Khoji

Life is **motion**, consciousness in motion; and motion effecting all matter is '**vibration**'. In the beginning, it was all consciousness. Consciousness emanated **vibration** called the '**Word**' or '**Sound**', i.e., '**Shabad**', which **projected the entire cosmic world**. This 'vibration' is the first projection of **Primal Energy** or **Infinite Power**, from which infinite types of vibrations sprouted, fructifying into numerous types and forms of matter.

Matter is this nothing but an expression of energy. In other words, existence of varied forms of matter is directly attributed to the process of combination and permutation of infinite variety of vibration. Different ranges of electricity, sound, etc.; all are modes of vibrations of the same nature in **ether**, though they differ in frequency and quality.

Thoughts, desires, actions, etc. are also made up of vibrations, but differ in their phenomena because of different character, frequency and intensity. Every thing in the universe, whether living or non – living, having been created by certain types of vibrations, also **emits the same type of vibration in the cosmos**. So also, thoughts caused by certain type of vibrations emit the same kind of vibration in the cosmos, which are **recorded by the cosmic infinitude**. In other words, the cosmic apparatus constantly **registers and emits** all types of vibrations affecting everything in the universe.

Human soul is an **integral part** of the 'Prime Soul' or the supreme consciousness, in very much the same way as a ray of light belongs

to its source – ‘the Sun’. The two differ only in **degree** (power), but in **essence** (quality) they are the same.

Of all other living forms in the universe, human form is the **most highly evolved being**, as it has the exquisite faculty of discrimination, called ‘intellect’. For this quality, man is said to have been created by God ‘in his own image’. Thus, human form is the **cream** of cosmic creation.

Human mind is endowed with the discriminating power of intelligence. Mind is nothing but a **subtle phenomenon** of thinking. It operates through thoughts; if thoughts do not exist **mind loses its identity**.

Because of its multifarious assignments, such as ambition, emotion, sentiments, feeling, instinct, inclination, imagination, volition, etc., the mind has acquired its mercurial nature.

Acting in collusion with the sense organs, the mind **rouses** the **five nerve-centres** in the ‘Consciousness,’ and they in turn, **propel** the executing organs to activity. They are:

LUST

ANGER

GREED

ATTACHMENT

EGO,

which **affects the intellect, distort its power of judgment and discrimination,** and **drive the man** to act as a 'slave' to 'mind'. It is therefore, essential for the man to **tame the mind** and harness the power of thoughts.

Mind can be compared to the ocean. Just as wind causes ripples on the surface of the water, so are thought-waves caused on the surface of the mind. Certain strong waves of thought dive deep into the sub-conscious mind; they are like under-currents at the seabed.

Mind is never calm and vacant. Rumbling waves of desires, ego, ambition, craving, anxiety of possession, attachment, etc. always **disturb its equipoise.** Although **intellect is superior to 'mind'** because of its power of judgment and discrimination, yet the man is **easily amenable to the fascination of sensual gratification.** Thus, 'intellect' **plays a puppet in the hand of the mind.**

POWER OF THOUGHTS CHAPTER 2

By: Khoji

Mind is the link between 'sense world' and the 'soul realm'. **Mind operates through thought**, which is a subtle, vital, living, force; capable of acquiring infinite power.

Thought is a **subtle wave or vibration** emanating from the mind are called 'thoughts'. There are infinite types of vibrations of love, hatred, envy, jealousy, anger, sensuality, etc., in the cosmos. Depending on the 'principle of like attracts like', we attract certain types of vibrations from the cosmos according to our 'instinct' of previous and present life. Consequently, these vibrations are **potentised by frequent repetition**. In this way, we in turn **generate and transmit** these vibrations in the cosmos.

Everything there is in the universe in the material form (seen) had its origin first in thought (unseen). What we speak is a mere expression of thought. Poetry, a great writing, a fine piece of art, or a science and engineering marvel are all the results of thought.

Thought is, in fact, the **primal force of the genesis** at the back of all creation. The present universe is the cumulative result of our collective thoughts and feelings. The universe, in reality, is the **projection of our mind**, which in itself is the **store-house or computer** of our acquired impression, which is expressing themselves in impulses and thoughts.

Every thought has a mental image, hue, form, dimension, etc. It is the:

Genesis of past thoughts and actions,

Vehicle of the present life and
Seed of future propensity,

affecting life individually and collectively, and transforming the physical and mental world continuously and imperceptibly.

Thoughts travel far and wide in all directions at a lightning speed, carrying subtle notes, which are registered in the cosmic records. Powerful thought-vibrations travel at a tremendous velocity and are received through mental antennas of those who are receptive **to such vibrations** in the same frequency.

Thoughts when focussed and directed become **dynamic forces and produce deep impressions**. You can well imagine the 'intensity of sun-rays' when they are concentrated through a magnifying glass (double-convex lens) on to piece of paper.

Every one is living in one's own world of thoughts, continuously absorbing or repelling the vibrations of other thoughts recorded in the **ether**, according to the particular wave-length and **frequency**.

Every thought is a link in the endless chain of **cause and effects** to produce:

Desire - stimulating drive;

Thought - manifesting in action, and

Activity - weaving the web of character, fate and destiny.

Pure thoughts are Divine forces which pervade human existence right from the birth. They radiate joy, hope, solace and peace to the entire humanity.

Persistent thoughts of egoistic desire, selfishness, and covetousness breed, develop and nourish anger, hatred, jealousy, revenge and the like, which give rise to malicious tendencies leading to heinous actions. In the other hand, noble thoughts of love, compassion, kindness, etc. produce noble men and saints.

Power of thoughts lies latent in us, and can be developed to **make or mar** our own life and destiny. We are continuously attracting to ourselves forces and condition most akin to those of our own thoughts. Our particular **thought within** connects us with a similar thought from **without**. It is, therefore, important for us to recognise as to how we live in our **thought-world**.

Our thoughts instantly reflect on our face and features. They chasten, chisel and fashion our countenance, which is an index of our inner character. The facial expressions expose the true state and substance of our mind; however we may try to hide it.

Our face and eyes are:

sensitive registering apparatus,
faithful reflectors,
clear mirrors, and
true expressions

of our inner feelings.

Every thought produces a strong vibration in every cell of our body, and leaves a deep impression on our sub-conscious mind.

Impression from the depth of the subconscious mind come up in the form of thought-vibrations or mental images, and direct our actions

accordingly. Therefore, **we are the makers of our own habits, circumstances, character and fate.** These thought-vibrations are transmuted to every fibre and nerve of our physical body, and **cause** electrical, chemical and biological changes, affecting our physical and mental condition.

Every good and sublime thought conjures a noble spirit and initiates good action, contributing to our health and happiness. This also has an invigorating effect in improving our physical and mental condition, even during moments of depression and exhaustion.

On the contrary, every depressing and negative thought has an adverse effect on every cell of our body, causing physical and mental exhaustion. Most of the present-day diseases such as hypertension, joint-pains, stomach ulcer, insomnia, spondylosis, chronic indigestion, heart-ailments and many other diseases, have their origin in the psyche, i.e., **habitual negative thinking**, which cause substantial abnormality in different body-tissues. It, therefore, accrues that a **mere mode of thinking can create heaven or hell for life.**

It implies, therefore, that thoughts having tremendous force can:

Execute desires and passions,
Fashion our countenance,
Develop our character,
Work out circumstances,
Influence and transform our behaviour,
Shape our destiny, and
Contribute towards shaping the universe.

The force of thought, thus, works:

systematically,
subtly,
imperceptibly,
consistently, and
dynamically.

We have a **free will** to choose between:

virtue and vice,
friends and foes,
good and bad,
happiness and sorrow,
health and disease, and
heaven and hell.

All these conditions are the **outcome** of our own thoughts and deeds, and are **subject** to our discretion.

We have the free choice of thought, feelings and actions. So, **it is up to us alone** to discriminate, decide and work for a better and more sublime life. Our thoughts make us what we are here and hereafter.

Happiness or misery is, therefore, the **result** of our own thoughts and actions.

Poverty, misery or misfortune, may, in fact, prove a blessing in disguise, as through **higher and constructive thoughts**, one may develop humility, endurance, faith, etc. conversely, affluence and luxury may breed inertia passion, arrogance, faithlessness and resultant vices.

The present state of our lives had been shaped by our own thoughts, and if we desire to change it for the better, we have to discriminate wisely and **choose** the higher and more sublime course of thoughts.

In the world of today, most people believe in epicurean philosophy, i.e., 'eat, drink and be merry'. This is a devilish idea and leads to sorrow and miseries. We should 'eat-to-live' and not 'live-to-eat'.

POWER OF THOUGHTS CHAPTER 3

By: Khoji

Our thoughts are dissipated in many directions and in order to cultivate and develop their power, they have to be focussed to a single point.

With purity, concentration and meditation, thoughts can develop tremendous mental power and strong will. Only calm, serene, cheerful and pure mind, with **faith and devotion** can concentrate and meditate.

Higher and spiritual thoughts, sustained by persistent meditation, can intuitively 'tap' or ignite our latent soul, and we can partake and enjoy peace, joy, bliss and love of the DIVINE REALM.

There is no physical or mental limitation of time and space in the process of spiritual working. The spirit transcends all limitations and pervades and engulfs the Universe at a lightening speed.

For the development of power of pure and sublime thoughts, it is essential to **resist and avoid** all lower, obnoxious thoughts and impulses of worry, fear, anger, envy, sensuality, etc., which disturb and distract the mind. These obnoxious thoughts are the **root cause** of all our worries and mental tensions. The impure negative thoughts should not be entertained; they **gain strength by repetition**. They should be **nipped in the bud** by ignoring and avoiding them, as soon as they appear. Even unimportant, useless and irrelevant thoughts should be avoided, as they rob us of our peace of mind and contribute toward mental tension. **They should not be allowed to take roots**. They should be replaced by kind, loving, devotional and inspiring thoughts and memories.

Mind assumes a teeming variety of modification. Mere understanding of the illusoriness of such modifications will not help; you have to develop the power to negate them, let the modifications arise, but do **not get yourself involved in them**. In the beginning, controlling the thoughts of passion appears formidable and impossible. Never try to suppress your thoughts. **Suppressed thoughts are more dangerous.** They get stored in the sub-conscious mind in the form of seeds. Whenever the conscious control is weakened, they manifest themselves with a bang. Therefore, the negative desires should be substituted with positive ones, or sublimated by analytical reasoning and non-cooperation with them. Light dispels darkness. Likewise, every higher sublime thought is a ray of light, which clears the dark clouds of evil thoughts.

Feelings and motives behind our thoughts and actions are very important and decisive. They should be:

pure,
sublime, and
constructive.

Lower, impure feelings are to be:

avoided,
repelled,
transmuted,
sublimated, and
spiritualized.

But it is an uphill task as our mind easily flows in to the old grooves

of lower vicious thoughts. By its very nature, the mind always goes for material things and worldly pleasures; but is never contented. Although it recognises the consequences of its entire doings yet it cannot resist the temptations. Conquest of the mind is more difficult than the conquest of the world.

The only way it can be tamed and subdued is by a superior, higher, and nobler love than the love for worldly allurements. This superior love is in the taste of **Naam** or **Shabad**-the '**Wordless Word**', realised through meditation in the sublime company of word-personified, Enlightened Masters. This love loses its wavering nature and is made completely calm. Otherwise a **bad master**, it then becomes an **excellent servant**.

Regular spiritual meditation is the **fire** in which the obnoxious thoughts and impulses can be **burnt**, and is the **quickest and best way** of cultivating mental peace and poise, and of **preventing mental tension**, which is the real killer of 'self'.

In the **process of weaning the mind** away from vicious thoughts of external objects, and fixing it on divinity, '**Simran**' (repetition of God's name) is very effective. Meditation is a dynamic spiritual force to antidote and counter-act the negative vicious thoughts of hatred, lust, anger, greed and pride, and to substitute them with positive and virtuous thoughts of humility, purity, kindness and love. When **meditation** becomes **regular and devotional**, our mind becomes more potent and strong to **resist the temptation** of lower destructive vicious thoughts.

Gradually and imperceptibly, the spiritual effect of meditation will transform and sublimate our thoughts which will spontaneously **reflect** on our countenance, environment, dealings, habits,

character and fate. Thus, new, nobler and spiritual **grooves and avenues** will be formed in our mind which will slowly, but surely, prepare us for the attainment of 'God-head', i.e., Consciousness of Divine Existence, Divine Love, Happiness and Bliss.

God resides in our hearts, and the only way to worship Him is by **cultivating sublime thoughts** and meditating on His Name. With regular practice of meditation, **thought-waves subside** and in that **perfect stillness of mind**, the **self-effulgent soul shines forth**.

POWER OF THOUGHTS CHAPTER 4

By: Khoji

For the practice of concentration and meditation:

silence,

solitude,

regularity,

guidance and

company of the **awakened and illuminated soul** is very essential.

It must be realised that thoughts are means of externalization and **objectification** of the Universe. Thoughts activate and express themselves in us through 'I', 'Me' and 'Mine'. When our thoughts are **spiritualized by mediation, ego consciousness** is transmuted into **Divine Consciousness**, and our mind works **in tune with**, and as an **instrument of the Divine Will**.

Determination and persistent striving is needed to build up the desired character, which is the deciding factor to resolve all issues and problems of life – good or bad – and **make or mar life**.

The circumstances, environment and fate are the **materialisation of our own thoughts**, and we have no right to put the on us of our miseries on other. Peace and prosperity can be ensured for the entire humanity **only by generating a new thought-force**.

Propagation of teachings and philosophies of Saints and 'God-men' will go a long way towards the creation of **sublime world of grace**. One should also cultivate the habit of reading the literature and writings of holy men to purify one's thoughts.

Thoughts are the **cause or seeds** of all our physical actions,

emotions and impulses. So, if we want to change our life, character and fate, we have to **strike at the very root** and transform our thoughts for the betterment, through:

- sublimation of our consciousness,
- faith in God,
- meditation on His Name,
- company of Enlightened Souls, and
- Grace of the Guru.

In this way, our own life, as well as the civilization of the world, can be sublimated and ushered into the **Divine Realm**.

POWER OF THOUGHTS CHAPTER 5

By: Khoji

Thoughts have no power in themselves. They merely act as **carriers or channels** of power.

All the power belongs to God.
There is no other Power.

The universe derives all kinds of powers from the source of Divinity.

The Divine Power is infinite, all-engulfing, all-pervading and self-effulgent, and is projected and manifested in the universe in various reflections. Every Particle of the cosmos possesses this **heritage of Divine Power** in full and profound measure.

Thick and coloured curtains inhibit and diminish the power of light. Similarly, the intensity of thought-power is diminished when it passes through coloured or polluted mind.

Divine Power is dissipated in the process of **external flow** through **minds** diversification. This means, when sensitive thought-vibrations pass through the various channels of the mind, viz. lust, ego, anger, greed, attachment, etc... they get frittered and weakened, thereby losing their **intensity and power**.

The subtle soul-vibrations are originally pure and sublime, but during their outward transition, they are subjected to our mental conditions, and thereby get influenced, polluted, and weakened.

Limitation of power is thus mainly due to our depraved ideas and

conceptions which modify, depreciate, diminish, restrain and obstruct the flow of the Infinite Divine Power.

The supply of Divine Power into our mind is contingent to, and limited by, the condition of our belief and faith in Divinity. Faithlessness of our materialistic mind is an obstruction to the inflow of Divine Power, i.e. misguided and ill-conceived thinking limits the flow of Divine Power into our mind and body.

Realisation of God's gift of Infinite Power is directly proportional to the intensity of our 'belief and faith' in His Divine Power, and only in that proportion we partake and enjoy the profound benefit and bliss of His Infinite Divine Power, inherent in our souls. Consequently, we also **limit** the outflow of Divine Power, Bill and Love, **through our mind-channel**, for the benefit of mankind. In fact, when thoughts and conceptions are sublimated in our consciousness, we become **in tune with the Universal Will**, and the Infinite Divine Power beings to flow through us to the universe and we become **channels** of the profound Divine Power.

Since the onus of all the experiences on the physical and cosmic planes lies in our own thinking, conceptions, beliefs and faith, **intuitional spiritual discrimination** is very important and essential. This spiritual discriminating power can be acquired only in the company of **Illuminated Souls**, i.e. through **Divine vibrations** emanating from such Souls.

Extremely sensitive spiritual vibrations originate and emanate from **Divinity** which are pure and dynamic. But, as they transit through our polluted minds, their power and purity is diminished in the **process of externalization**. Hence, the more our thoughts are scattered, contaminated and depraved, the weaker they become.

On the other hand, the more our thoughts are purified, sublimated and spiritualised by concentration and **meditation**, the more they retain their **original, inherent, spiritual dynamism**.

Every thought that passes through our mind leaves an indelible **brace** amongst the millions of cells of our brain. So whatever we do, makes it easier for us to do the same thing over and over again. This is because electric currents record all that happens to us by creating **path ways** or **impressions** among the cells of our brain. The more frequently the same thoughts and actions are repeated, the deeper and more pronounced the impressions become.

These impressions are unconsciously and constantly accumulating in our **Mental Computer** and they affect and **shape** our ideas, conceptions, beliefs, and faith; their sum-total is **manifested** in our behaviour, habits, character and personality.

Ninety percent of our personality is made up of, and represents our **inner** mental, emotional and spiritual qualities; only 10 percent of it can be attributed to the outer environment. These influences are acquired through our mental inclinations and experiences both during the present and past many lives.

Every Smallest stroke of virtue or vice **leaves behind** an **ever-so-little** scar on our mind - good or bad - never to be undone. this scar or influence is so powerfully embedded in the sub-conscious mind that it is wholly carried forward through lives, birth after birth, and shapes man's destiny to prove the **Karmic Law** of "As you sow, so shall you reap".

The drunkard excuses himself for every fresh dereliction by saying: "I won't count it this time". Well, he may not count it, but it is

being counted non-the-less in his **Mental Computer**, deep down into his nerve-cells and fibres, molecules and electrons in his subtle folds, to be used against him when the next **temptation** arises in his mind.

Man is incessantly weaving a good or bad '**cone**' around himself, by his own thoughts and actions, like a silk worm; thus **shaping his own fate and destiny**.

Thoughts have tremendous power which can be **developed** to unlimited degree by repetition, contemplation, concentration **and meditation**.

Lower, depraved thoughts should be forgotten or **brushed aside** at once, as soon as they come, by **diverting the mind to higher, nobler and inspiring thoughts**

"As you sow, so shall you reap"

"Sow a thought, reap an idea;
sow an idea, reap an action;
sow an action, reap a habit;
show a habit, reap a character;
sow a character, reap a fate;
sow a fate, reap a destiny"

Human mind is unconsciously and incessantly **weaving and shaping** its own good or bad world within, by its own thoughts. Similarly, every thought - good or bad - that emanates from the mind **sends subtle vibrations** all over the universe, which are **registered** in the infinite Perfect Universal Computer of Consciousness

POWER OF THOUGHTS CHAPTER 6

By: Khoji

Millions of thoughts, emanating every moment from the minds of the entire Universe, are being registered and processed by the **Universal Computer** and shelved into like **cycles and wave lengths**. The cycles and wave lengths of various hues and categories, and subtle vibrations thereof, **accumulate and shape the subtle environment** of the **Universal Mind** just as in the case of our individual mind and sub-consciousness.

In this subtle process, our thoughts have **profound** influence in:

- directly shaping our character, fate and destiny;
- indirectly moulding and modifying the subtle environment of the universe, and
- re-coiling on the whole humanity, collectively.

In fact, every thought is a **dynamic seed** which sprouts, gains strength by repetition, spreads in the **mental world** and **engulfs** the entire universe **to make or mar** our lives, according to the nature of our thoughts.

This explains the **tense and vicious environment** of selfishness, pride, unrest, strife, jealousy, cruelty and wars prevailing all over the world, in spite of numerous **professed religions and cults**, and all efforts of august institutions, like U.N.O., etc.

God created a Heaven for his children to live in and enjoy, but we, the **prodigal sons** of the Earth, have turned it into a **hell like** vicious rendezvous under the influence of our lower, depraved

thoughts, and have thereby degenerated moral values.

The **cultivated dynamic thoughts** are so powerful that they are capable of **modifying** the cumulative result of our past and present lives. They are so insidious and permeating that they definitely have a **profound effect** on our **future as well**.

The sound of a particular frequency and wave-length is caught and relayed by any radio set which is **tuned to** that frequency and wave length.

Similarly, thought-vibrations of different intensity, frequency and wave-length can be **caught, perceived and conveyed** by any mind or minds which are **tuned to** that frequency and wave-length, may be anywhere in the vast limitless cosmos.

This means that the **cumulative results** of our good and bad thoughts are **registered** in the universal computer, caught and conceived by any **mind-radio**, whenever and wherever it is, provided it is **tuned** to the right frequency and wave length of the originating thought. In other words, the waves or vibrations of a particular thought simultaneously pass through every **mind radio** which is tuned to that wave-length.

This explains why drunkards and villains, or noble and pious people, get attracted towards each other to prove the idiom: "Birds of the same **feather** flock together". Our **audio-visual process** of electronic science works on the same principle.

This principle of **attraction and communication** at the same wave-length is working invisibly and imperceptibly throughout the universe, even **beyond the limits of death** and subtly affects our

mind process and shapes our environment and relationship in next lives. The kind of environment and relationship, good or bad, that we wish for in our next life, can be **decided and shaped in the present life itself**, through our thought-process, by merely transforming our ideas and thoughts to a **higher and nobler wave length**, with contemplation and **meditation** on sublime and inspiring thoughts, with **intensity of feelings and faith in the Divine compassion of love**.

This Eternal Universal Law: "As you think, so you become", is illustrated by the following story published some years ago.

"There was an old lady who had suffered numerous misfortunes and miseries in her life and was overwhelmed with frustration, indignation, anger, hatred and sadness. Her life became devoid of happiness, hope, brightness, and goodness. She became irritable, quarrelsome and furious. Gradually, her vicious temperament adversely affected her health and reflected on the features of her face which looked **ugly, haggard, abhorrent and repulsive**. In due course, all her relatives and friends deserted her and she was left alone to lead a dry, dreary and miserable life. The people around her avoided her **repulsive company** and children would run away to hide from the sight of her ugly **dreadful countenance**.

A noble soul took compassion on the wretched condition of this old miserable lady and approached her with kindness and sympathy. She asked her to recollect the brightest and happiest occasion of her life. The old lady at once brought her wedding photo and started narrating the happy and blissful events of her marriage. As she did so, **lustre** came back in her sad eyes and the features of her old wrinkled face became blooming and attractive. The good lady took

her to the mirror and told her to carefully observe and mark the difference between her own features before and after the interview. The old lady was astonished at her own bright eyes and glowing face in spite of her wrinkled skin. Actually, she was frightened to compare her new features with her usual miserable repulsive countenance.

The crucial point in this story is the **sudden change** in her countenance wrought by the **sweet and blissful memory** of a bright and happy occasion of her life. It was the direct and immediate result of the **change** in her thoughts.

She was advised to **replace** her usual depraved thoughts with higher and nobler thoughts and **contemplate** frequently on the **brighter side of life**, with thankfulness for the blessings of the lord, as often as possible.

By and by, her features changed for the better and lustre of her eyes returned, and her behaviour became reasonable and endearing. **Her repulsive** countenance became attractive and lovely. Her neighbours and friends again flocked to her to sympathise and cheer her up, the fearful children came running to her and enjoyed her newly sprouted affection and kindness.

Ultimately, she died as a 'Loving Noble old lady' instead of that 'repulsive, witch-like old lady', thus ensuring herself, endearing, kind and loving life in there **here-after**.

The **magic** that wrought such an unbelievable and wonderful miracle to the hopeless, despondent and wretched life of the old lady, is Eternal Universal Law:

As you Think, so you Become.

The power of thinking is attributed to the degree of one's faith.
Every aspect of our life revolves around the axle of **thoughts** in
respect of our belief and faith being:

good or bad,
noble or depraved,

and hinges on --
kindness or cruelty,
compassion or selfishness,
love or hatred,
happiness or sadness,
health or sickness,
prosperity or poverty,
virtue or vice,
friendship or enmity,
Godliness or devilishness,
heaven or hell, etc.

POWER OF THOUGHTS CHAPTER 7

By: Khoji

If we desire and aspire for higher, nobler, healthier and happier life, we must first of all avoid, discard, brush aside or forget our lower ideas and thoughts, as soon as they sprout in our mind. At the same time, we should try to replace or substitute them with higher, nobler and inspiring thoughts.

If the depraved thoughts are not forgotten or diverted, but are entertained and cultivated, they percolate and permeate deep into our mind and then into the sub-consciousness. Gradually, in course of time, they become insidious and powerful to enslave us, make us corrupt, depraved and vulgar, with a trail of lower elements of selfishness, envy, prejudice, avarice, jealousy, hatred, anger, egoism, aggressiveness, wickedness, cruelty and what not.

The easiest and quickest way to get out of this vicious circle of harmful thoughts, and to save ourselves from the pernicious(deadly/harmful) consequences of these depraved thoughts is:

- to replace and substitute them with higher, nobler and inspiring thoughts,
- to divert our mind to sublime contemplation and spiritual meditation; and
- to seek awakened and enlightened souls and imbibe sublime inspiration in their holy company

The example of a vessel with putrid and stinky solution will illustrate the point, and make it more comprehensible. It may be easy to pour out the foul solution from the vessel and replace it with better

one, but the putrid solution of the 'mind vessel' cannot be wishfully poured out.

This **Mental Solution** constitutes infinite, perverted ideas and thoughts, insidiously collected and condensed in our **Mental Computer** over many many years and countless past lives.

Therefore, we must understand and realise how tedious and difficult a task it is to change the pernicious(deadly/harmful) and vicious **thought solution of our mind-vessel**, and to adopt and practically work a new course of higher and nobler lives. Our efforts in this direction have to be **incessant(continuous/never-ending), steadfast and tenacious(persistent)**, with determination, resolution, perseverance, against all kinds of circumstances, environment, temptations and stubborn **opposition from perverse(vicious) elements**, both **inside and outside**.

As explained above, our lower and depraved thoughts have engraved very deep grooves in our sub-consciousness, through so many past lives, and have **fructified** into our **character** or second nature. Therefore, persistent, tenacious and Herculean efforts are required to change, modify or erase these **perverse(vicious) grooves** from our sub-consciousness, so as to manifest any **perceptible improvement** in our behaviour and habits.

However, we should not be discouraged by our slow progress, or recesses, **but continue** persistently, with renewed resolution in our efforts, until we make a **mark** for the better, in our behaviour, habits, ideology and character.

Thereafter, the **process of change** becomes smoother, quicker and **more manifest** in every aspect of our daily life.

But the crucial point is to develop our inner sense of discrimination, where we can distinguish between:

right and wrong
good and bad,
virtue and vice,
morality and sin,
love and hatred,
materialism and religion,
religion and spiritualism,
saint and hypocrite,
God and 'devil'; and

make the important **choice** of our future course of higher and nobler life.

Without this discrimination and choice, our lives are like **compass-less, radar-less ships** drifting about aimlessly, and knocked about and battered by storms and vagaries(extravagant action) of the vast ocean.

In order to:

- develop the power of discrimination,
- make decisions about crucial choices of the life's course,
- take a turning point of life, and
- walk on the chosen course of life,

inspiration, help and guidance of the **Enlightened Souls** is very essential. In their company and with their guidance, our minds are gradually purified and spiritualised, and we become amenable(open

to) and conducive to the sublime influence of subtle vibrations of Divine Light and Energy. At the same time, the influence of materialism is imperceptibly reduced from our consciousness in due course of time.

The More our thoughts are **spiritualised** by **sublime company** and meditation, the more they become subtler, powerful and dynamic, with reflections from Divine Light and energy.

POWER OF THOUGHTS CHAPTER 8

By: Khoji

Minute sensitive waves of our **thought-current** are constantly and **habitually scattered and wasted** in the **outer** directions towards the **materialistic world**, and are **spent, absorbed and lost** in materialism. These **extroverted thought-waves** have to be **collected, concentrated and directed inwards** to the source of all powers, i.e. **our souls**.

This is practically a **Reverse Process** of mind

From --

habitual, unconscious process of **extroversion** in which we are **frittering away and spending up** our latent inherent power and making our mind and body **weak and exhausted**.

To:

introspection, i.e., **directing** our thought-waves **inwards** by concentration, contemplation and **meditation on Divinity** -- the source of all Powers.

By this **Reverse Process**, we **conserve and strengthen** our energy and **augment** our inherent power by **contact with** and **reflection** from the Omnipotent Divinity.

This reverse Process of mind, called **Meditation**, has been defined and described in the past in numerous scriptures by Spiritual Masters, and various methods have been suggested and prescribed for its practice from time to time.

The easiest process of meditation is to concentrate the mind on the **Divine Words**, i.e. **Gur-Mantar**, and **repeat** it continuously for some minutes in the beginning. The duration of meditation should be increased gradually with practice. Sit in a comfortable posture in a reserved room, close your eyes and meditate at a fixed time regularly, both morning and evening, and also at any other available time during the course of the day; even during **sleepless** intervals of night. Keep reminding your mind to avail (take advantage) of all possible opportunities, without letting off a single one, in **repeating the Gur-Mantar**.

Repeat the Gur-Mantar in a slow voice, so that you may hear the whisper yourself. By this simple method, concentration on the Word becomes easy and smooth. (through continued, persistent practice)

This is, of course, the **preliminary technique**, meant for the beginner.

In due course, with **consistent un-interrupted** practice of repetition, the **Gur-Mantar** will **imperceptibly dissolve into Shabad**, i.e., **Word-Less** WORD, vibrating with sublime thrill, bliss, joy and love. At this stage, **Simran** or meditation becomes effortless, automatic, spontaneous and enjoyable.

To attain such an exalted state of **Blissful Consciousness**, the following pre-requisites are essential: -

minimum involvement in worldliness,
complete detachment,
complete and utter discard of Ego,
unflinching faith in Divinity,

intense devotion to Guru,
selfless, loving and devotional service,(seva)
regular, faithful, meditation on **Naam**,(simran)
inspiring company of illuminated and Enlightened **Souls**, viz **God-**
Men,(sangat)
and Guru's Grace.

POWER OF THOUGHTS CHAPTER 9

By: Khoji

We erroneously(mistakenly) identify our **self** with our body and environment. This identification and attachment is the **root cause** of our bondage, misery and sufferings. Actually our body and the visible world around us, are mere **projections** and **materialisation** of our **mind process**, i.e. our thoughts, emotions, perceptions, convictions and faith. It is the mental state of consciousness that we imagine, think and **behold** any thing as a person or material; and something as good or bad.

In as much as the sense-world is a mere **image** in the mind, the mind acts as an instrument for the projection of its higher-self, i.e. The Soul. This higher-self or the God-consciousness is the basic, original, only real **and eternal creative principle**, and **substance** of all life. However, the dense clouds of our egoistic **thoughts** and beliefs over-shadow the effulgent soul within, and we fail to recognise and realise our Divine Inheritance.

God-consciousness operates through the **faculty of the mind**. On the intellectual plane, we might be tempted to think of mind as creative possessing power. But, in reality, it is the omnipotent Divine Soul, which **manifests through the mind** in all physical form. It is merely the **condition of mind** which determines as to what we see and experience in the material world.

We often say, a particular person is very material minded while someone is Spiritual-minded. But mind, by **itself**, is unconditioned. It simply **projects** what is **entertained** in it through the thoughts. We are either letting it be permeated with higher, sublime thoughts or lower, depraved thoughts. A mind receptive to the Divine Inflow,

and conditioned to the thoughts of purity, cooperation, charity, forgiveness, kindness, and love must exude goodness, peace and harmony. On the other hand, when the mind **misuses** its **inherited freedom** and entertains perverted thoughts, it becomes out-of-tune with the Divine Will, thereby creating disharmony in the material world. A mind filled with negative and depraved thoughts of fear, disease, limitation, lack, selfishness, lust, malice, hate, revenge, etc... reflects them in all aspects of our life.

Since the **good** or **bad** that comes to our experience is determined by what is **allowed to pass through the mind**, the importance of **thought-power** in making a **harmonious** living or a **hell** for ourselves, and for all the world around, cannot be overemphasised. We simply create what we think.

However, as long as we are attached to any kind of thoughts, good or bad, we are still in the **realm of mind**. Once we come to realise our **true identity through the faculty of mind**, we simply surrender 'our self' to the 'God self'. This conscious awareness takes us beyond the realm of mind, into God's Grace. In such a surrender we are stripped-off of our personal sense of power - both physical and mental - and realise that only God's Power creates and directs the universe, and sustains all its activity.

In the **Spiritual Sense**, the mind only functions as:

- a means for the realisation of God-consciousness,
- a channel of the projection and manifestation of the Divine Power.

A mind **imbued** with Spirituality becomes an instrument through which the Divine Grace flows and externalises in the form of abundance, harmony, peace, joy, bliss, and love; resulting in a

wonderous, beautiful life.

POWER OF THOUGHTS CHAPTER 10

By: Khoji

The conception of **mind-power** is as **illusory** as that of **material power**. both belong to, and work within the cosmic world. They are governed by various cosmic laws, such as:

The **Karmic Law** -- 'As you sow, so shall you reap'.

As you think, so you become

Like attracts Like

Law of compensation

The law of action and reaction

Law of Gravity

The law of relativity, etc...

These powers can be acquired and developed, or depleted and lost, according to the concentration and condition of our thoughts and the consequent actions. They are, however, quite limited and fleeting, and are **subject to the law of duality** in that they can be manipulated and used for **both good and evil** purposes.

Lost in materialism and mental powers, we conveniently forget that there is but **one real power**, and that power is **God-Power** or the Divine Power. Divine Power is the source and fountain-head of all power; and the cosmic powers are derived from, and are only a faint reflection of this innate, Spiritual Power.

The Divine Power is infinite. Its sunshine - the 'Word' (Shabad) or 'Naam' is also boundless and infinite. it manifests by itself, and remains the only --

original,
self-creating,
sustaining,
effulgent,
glorious, and
eternal

principal of the universe.

The Divine Power is ever expressing itself as:

Eternal Life

Light

Wisdom

Power

Abundance

Kindness

Compassion

Love,

and above all, a rhythmic flow of Grace.

God's Spirit is inherent in all creation. All the elements of the cosmos are created, developed, sustained, integrated and disintegrated by this Supreme Divine Power. These elements work under the cosmic law, projecting from the Divine Will.

God is infinite source of Grace, Power and Bliss human soul is a natural heir to that heritage. If we have not been able to **appropriate** in full this Divine Heritage, it is due to our **depraved thinking** and egoistic consciousness.

Being a ray of Infinite Light - The Prime Soul, the journey or flight of the human soul extends to infinity. There are **infinite realms** through which the soul has to pass on its way to **Eternity**. The infinite Divine Power is inherent and lies latent in every soul. We have only to tap the fountain of this Divine Power within our Souls to become **channels** for the projection of Infinite Spiritual Power.

When the soul is enlightened by the Grace of God, and intuitionally ushered into the Divine Real, it is filled with all the sublime attributes of Divinity, and Divine Power flows through it smoothly and effortlessly.

The enlightened soul inherits and acquires dynamic Spiritual Power which overshadows all other worldly and psychic powers with its effulgence and glory.

In fact such Illuminated and Enlightened Souls become **Ministers of the Cosmos**, capable of controlling its elements. A mere passing **wish** of a **God-man** can **activate the elements** and **work extra-terrestrial Phenomena** or **Divine Miracles** which strike awe and amazement in the minds of common people.

These powers are **Gifts of God** and flow into the minds of God-men from Divinity.

But when we are tempted to use these sublime powers-

for selfish materialistic ends,
to feed and boost our **Ego**,
to exhibit spiritual achievements,
to entertain the curiosity of people,
to attract and allure large number of admirers and followers,

to exalt our religious or spiritual personality, or
to advertise our name, fame and holiness,

we are degrading, **disgracing** and **misusing** the **Divine Gift** of
these powers.

By taking material and religious advantages of psychic powers, we
are --

misusing these powers,
denigrating their sublimity,
digressing the Divine Law,
interfering with the smooth natural flow of Divine **Life-current**,
acting **out of tune** with Divine Harmony,
sinning against the Divine Will, and
unconsciously spending and losing the acquired power.

When we are blessed and bestowed with the Divine Gift of Spiritual
Power, we become --

- mirrors for the reflection of Divinity;
- channels for projection and manifestation of Divine Power;
- agencies for dispensation of sublime attributes of kindness,
compassion, energy, joy, bliss and love; and
- media for the expression and working of the Divine Will

This is the culmination and ultimate fulfillment of the **purpose of
our lives** in the Eternal Divine Drama of the cosmos, and this
conscious realisation of the **Grace of the Lord** fills our souls
with His Blessings of sublime wisdom, joy, bliss, and love.

The worldly powers of mind and materialism only **boost and**

inflate our egoistic consciousness, and are liable to be misappropriated and exploited for baneful selfish purposes. They also **deviate us** from the real goal of Spiritual Life of God-Head.

The salvation of the world, therefore, lies only in the realization of Spiritual Power. This power we shall not manipulate for our personal glorification and ulterior purposes but rather we consciously allow **this power** to use us for the Divine purpose.

The **real power** is in this **conscious union with God**. In His Grace, there is but **one power, without an opposite**, and only the **Divine Law (Hukam) operates**.

The Divine Consciousness **can be experienced in a moment of silence**, by the **Grace of the Lord**, and the only way that leads us to that point is the **contemplation on and practice of Divine Naam** or the **meditation on the Divine Word**, i.e. **Simran with intense faith and love**. This is **made easy** in the company of Enlightened, Illuminated, and Blessed Souls - Sadh Sangat - because God's Grace incessantly flows to such **Spiritual Personalities** and in turn **flows out** from them to **bless the seekers**.

Power of Thoughts - Conclusion Part 1

By: Khoji

God is one, without a second.

God is the:

All powerful

All pervading

All engulfing

All intelligence

All kindness

All forgiving

All compassion

All embracing love

Infinite

Perfect

Omnipotent

Omniscient

Divine Father

Divine Mother

Divine Creator

Divine Sustainer

of the infinite cosmos.

God is immanent in His many Divine Attributes of:

Glory,

Grace,

Effulgence,

Power,

Compassion,
Kindness,
Joy,
Bliss, and
Love.

God is all powerful; i.e. all power belongs to God.

There is no other power.

The Divine Power is:

infinite,
all-pervading,
all-engulfing, and
self-effulgent,

and is projected and manifested through the cosmic consciousness
in various reflections.

Therefore, all other powers we perceive or are aware of, are the
reflections and projection of the Divine Power.

The cosmos **derives** all kinds of powers from the only source of
Divine Power.

But in our egoistic deception we believe that there are different
kinds of powers coming from different sources.

All the attributes of the sun, such as light, heat, energy, life
sustaining properties, etc... are projected, reflected and manifested
through **sun-rays** to sustain the cosmos.

Similarly, in His benevolent Grace, God spontaneously provides abundantly all the needs of His children, the creatures of the cosmos, even without their knowledge or asking.

The infinite celestial attributes of God mentioned above are silently, invisibly, secretly and immaculately reflecting and working consistently in the cosmos through His power and Grace, to create, develop, sustain and entertain His innumerable children of the cosmos.

We, the creatures, with even our limited power and intelligence, try to provide our babies with all their needs and comforts under the instinct of our parental affections.

Therefore, it is unthinkable that such a Loving, Kind, Gracious, Great Divine Father should have left His dear children to fend for themselves at the mercy of adverse materialistic forces.

In fact, it is the Divine Power and Grace that:

creates,
develops,
sustains,
degenerates, and again
regenerates

all creatures of the universe.

It is again God's Power and Grace that **provides in abundance all the needs** of His children for ever and without asking.

But we are unable to perceive and realize the Benevolent Divine Law of Providence in our egoistic illusion. Thereby we create obstructions in the natural inflow of Divine Power and Grace into our mind which becomes stagnated and depraved with wrong thoughts. In doing so, we invite all sorts of troubles, problems and miseries, and make a 'hell' of our lives.

The heavy clouds of selfishness, doubts, fears, conflicts, turmoil, confrontation, etc... engulfing the universe, is the result and positive proof of our depraved and wrong perceptions emanating from our egoistic consciousness.

Due to egoistic consciousness and superfluous faith in Divinity. We deprive ourselves of the ever-flowing abundance of His Kindness, Compassion, Grace and Love.

The light of the sun is reflected into our room through glass panes and curtains. If the glass panes are coloured and the curtains are heavy, the flow of light into the room is curtailed.

Similarly, when our mind is clouded with wrong thoughts and perceptions of egoistic consciousness, the **reflection** of the ever-present Divine Power and Grace on our mind is diluted and restricted.

In other words, the inflow of Divine Gifts of Love and Grace is in proportion to our faith in Divine Power.

The following illustration may **help** to elucidate(make clear) the subtle difference between:

- the 'Primal Divine Power' and

- the illusory conception of cosmic powers, working in the materialistic world

The sperm grows into foetus in the womb.

The foetus is being nourished and protected within the womb without outside interference or help.

This process of growth of the foetus goes on invisibly, secretly, with meticulous precision and ingenious perfection, in which the 'mother' has no conscious part to play. It is solely the Divine Power working silently, secretly and perfectly.

In fact, this wonderful process of 'gestation'(growth/conception) is one of the awe-inspiring miracles of Divine Power and Wisdom, but we take it as 'casual' and fail to recognise it as Divine Power. On the other hand, the 'mother' thinks that she herself has conceived, nourished, sustained and developed the 'foetus' into a 'baby'. This is the egoistic blasphemy on the part of the mother. When the foetus is grown, it is ushered into the world as a 'baby'

Power of Thoughts - Conclusion Part 2

By: Khoji

Here again the Divine Power and Grace works spontaneously to supply suitable milk:

in the breasts of the mother and instil the instinct of 'motherly' love for the baby in the heart of the mother.

With this 'motherly love' she cares for, nurses, protects and makes sacrifices, in the up-bringing of the baby.

As the baby grows, the Divine Power provides it with teeth to eat and also other human faculties.

Here again the Divine Power and Grace works silently and secretly for the

Growth

Development

Sustenance, and

Protection

Of the baby into full manhood or womanhood in which very little conscious part is played by the parents. But the egoistic parents think that the child has grown up with their own efforts and wisdom, thus denying the real Divine Power and Grace silently working in this process.

At both pre-natal and post-natal stages, God's Grace and Power

work through the body of the 'mother' for the growth, sustenance and development of the child.

In the case of the foetus, the mother's body is unconsciously used as an 'incubator'.

In the case of the 'baby', **God's Grace and Love** descends and permeates the heart of the 'mother' so that she can nurse the baby with tender care and affections.

This 'motherly love' is actually a 'reflection' of God's Grace and Love, and the 'mother' becomes a 'channel' for the outflow of the Divine Grace and Love for the baby.

In fact, the Divine Father who provides nourishment and protection to the foetus within the womb, and milk in the breasts of the 'mother' without the conscious knowledge of the baby and the mother, had created the vast Nature and made the Eternal Law of Providence to provide all the needs of His children in **abundance** for their growth, sustenance and entertainment **forever**.

In fact, the Loving Grace of the all-powerful Divine Father is 'all-sufficient', for the needs of His children to enable them to live in and enjoy the comforts of peace and bliss in the Heaven of Divine Kingdom.

But it seems so absurd and strange to think that human being – the 'king' of all creatures and made in 'His own image' – should be so unhappy, worried, miserable, and suffering in the veritable hell of his own delusions.

It is obvious that there are two distinct, contrary and opposite

worlds existing in the universe:

1. The world of **Peace, Bliss, Love and Abundance**, i.e. the Kingdom of God's Grace
2. The illusive unreal, self-created world of worry, turmoil, sufferings and miseries, i.e. egoistic world of Maya

The former has roots in the reality of Divine Presence and Grace, while the latter is based on false illusionary egoistic consciousness.

But these two worlds are **not** different physical planes or spheres. They are culmination of thoughts, perceptions, beliefs and faith **in our consciousness** – Egoistic or Divine.

If we have fallen from the 'Kingdom of God' to 'materialistic hell', the cause lies in our own **consciousness**.

It is, therefore, obvious that for the **transition** of our **ego-consciousness to Divine Consciousness**, the process of our thoughts and beliefs has to be transformed and reversed:

From – negative and depraved egoistic thoughts of materialistic world,

To – positive and sublime thoughts of Divine Love and Grace.

It is so easy to:

Discuss,

Give discourses,

Preach,

Philosophise,

Sermonise

intellectually about this 'reverse process' of thoughts, beliefs and conceptions, but it is a very difficult task to emulate and practise this 'percept' **honesty** in our daily life.

This is because the false idea of 'I', 'me' and 'mine', projected from the illusive ego has permeated very deep in our consciousness by consistent practice during so many past lives and has become a **part of our 'self'** and we cannot **think or act otherwise**.

Therefore, our understandings, beliefs and perceptions of '**things spiritual**' remain shallow and superfluous on the surface of our consciousness and do not **touch or affect** the core of our **egoistic self**. Hence, all this self deception and hypocrisy is prevailing in the universe.

In this 'self-deception' of egoistic consciousness, we believe that we **possess all powers to:**

- provide ourselves with all our needs
- fulfill our selfish desires and aspirations
- make our life comfortable and happy
- solve all our problems
- mitigate or remove our sufferings
- make plans for the future
- guide the destiny of our life.

But in spite of all our individual and collective materialistic and intellectual achievements, our problems, unhappiness and miseries have **not** decreased or been eliminated. In fact our problems, sorrows and miseries have been increasing and multiplying manifold

with the advancement of our so-called civilization, thus turning this world into a veritable hell.

It is **ironic** that in spite of:

- higher education
- scientific achievement
- massive religious literature
- unending social and religious propaganda,

humanity is still groping in the darkness of egoistic illusion of Maya; and peace, happiness, contentment, joy and love are still a far cry, beyond the reach of humanity.

Power of Thoughts – Conclusion Part 3

By: Khoji

The **crux** of the subject is that in our egoistic illusion, we **entirely rely** on our own illusionary power and intelligence, which is just a faint reflection or limited projection of the Divine Power. This illusionary power of mankind is the source of all evils, sufferings and miseries of humanity, such as:

Selfishness

Covertness

Pride

Corruption

Conflict

Confrontation

Quarrels

War, etc...

According to the saying 'Power Corrupts', and more power corrupts more – when we acquire:

- money power
- sword power
- gun power
- nuclear power
- physical power
- political power
- pen power
- intellectual power
- emotional power
- psychic power

- occult power
- hypnotic power
- magic power
- tantaric power, etc...

we become **more corrupt**, thereby we increase and multiply the problems, unhappiness, sufferings and miseries of the universe of these acquired powers for our **selfish ends to the detriment of others.**

All these powers are developed by consistent efforts and hard work over long periods, but are **useful for only a short span of life.**

They are liable to be modified, **diminished or lost** in course of time by exigencies of life, i.e. change of circumstances, disease, age, mishaps or death. Therefore, these acquired powers are **temporary, fleeting and illusive.**

With the development of these cosmic powers, our 'Ego' is **boosted and inflated.** It is only through our egoistic consciousness that we become aware of our **separate individual entities.** As separate entities, our individual thoughts, beliefs and interests come into **conflict**, which ensue all sorts of selfishness, bitterness, hatred, jealousy and confrontation. In such **egoistic clashes**, we are apt to abuse our petty powers to the detriment of others.

In our egoistic illusion, we believe that these fleeting cosmic powers are supreme and exclusive. We often **abuse** them for our egoistic desires and whims, and to carry out evil designs.

Hence these cosmic powers become '**negative**' and '**harmful**'. Some of these occult and magical powers are 'antisocial', violent,

destructive and horrifying, creating more problems and miseries in the universe.

Our individual and collective 'Egoistic Powers' are the root cause of all problems, turmoils, sufferings and miseries of the world.

When these egoistic powers **clash** and overlap, the problems **get intricat**~~ed~~**(complicated) and messed up.**

In trying to solve our problems, with our petty egoistic powers, we unconsciously and inadvertently **create many more problems.** Thus we are **caught in a vicious cycle.**

To extricate ourselves from this vicious circle, we again **unconsciously rely** on our own petty egoistic powers, which created this mess originally.

This makes us more unhappy, frustrated and miserable in this 'self-created' mess.

The corrupt and depraved state of our social, political and religious affairs, obtaining our homes, institutions, nations and the world, is the positive proof of that polluted thought environment and abuse of our egoistic powers.

If and when we realise that our **petty egoistic powers are inadequate** to solve our problems or mitigate our sufferings, we shall **turn to the higher Spiritual Power with humility and faith.**

This does not mean that we should not make efforts to acquire and develop our latent physical, mental and emotional faculties. These

faculties are **Gifts of God** to the humanity and should be developed and utilised to make our short sojourn in this world more happy and comfortable, and to guide others towards better and happy lives.

In fact, all these human faculties are '**Love-Gifts**' of the Lord to **his children** and we are **privileged to develop them for the good of humanity**.

With humble thankfulness and devotion we should aspire for, and seek the Grace of the Lord, for higher spiritual gifts of Divine Kingdom.

Like the sun-shine, this Grace of God is flowing eternally and is the only creating and sustaining principal of the Cosmos.

Our **faith in Divinity is the subtle 'fuse-wire'**, which can connect our 'egoistic self' with the sublime '**Divine Self**'. Then to the 'egoistic self' loses its false identity and merges with and becomes the 'Divine Self', through which God's Grace flows incessantly.

However, when our 'faith in Divinity' is weakened or lost, we become '**negative**' and are thereby **deprived** of the Divine Power and Grace.

Like 'Love', faith cannot be learnt, taught or acquired intellectually.

Faith is a subtle feeling of trust, belief and a condition of the heart and higher consciousness.

Faith is kindled, ignited, developed and intensified in our higher consciousness, i.e. intuition – by sublime inspiration from Men of Faith, i.e. Enlightened Souls – through:

Their personal contact and company

Their sublime spiritual writings

Their exemplary behaviour and inspiring life, and

The personal spiritual experiences of the aspirant.

Faith is the only means of communion between the aspiring Soul
and the Divine Self.

Power Of Thoughts – Conclusion 4

By: Khoji

Such spiritual communion can take place only in the higher consciousness of the soul, i.e. Intuition.

By such spiritual communion, all the attributes and powers of the Divine Self, - i.e. God - spontaneously flow into the aspiring Soul.

When a woman conceives, she develops subtle affection for her unborn child, which she carries in her womb. Unconsciously and constantly she conveys her subtle affections and good wishes to the foetus. The foetus receives these faint motherly affections during pregnancy, and tender 'motherly love' is unconsciously **implemented in the heart and soul of the unborn child.**

After birth, the baby continues to receive physical and emotional motherly love through tender care and nursing by the mother.

In this unconscious subtle process, the baby develops faith and love for the 'mommy'. To the baby, the mommy is her provider, protector, nurse, God and all-in-all. Her innocent faith in her 'mommy' is projected and exhibited in all her innocent childish babblings and pranks. Even if the mother scolds and beats the baby, she clings to her legs with tears of love and faith for the mommy.

Such innocent faith of the baby for her 'mommy' is very powerful as it drives the mother to provide her child with all her needs without asking.

The perfect innocent faith of the baby for her mommy, puts us, the grown-up intellectuals and wiseacres to shame, as we have very shallow faith in our Real, All Powerful Divine Mother.

As the baby grows up, she becomes intelligent, wise and independent, and her natural faith in the parents is proportionally diminished. In the degree, the 'faith' is weakened, parent's care is lessened, and in the end, the child is left to fend for itself.

From the above illustration, it transpires that so long as we have unflinching faith in our all-powerful Divine 'Mother', we are **unconsciously provided with all our needs**, even **without our knowing and asking**. But when the egoistic consciousness dawns on our intelligence, our innate faith in Divinity is **weakened, and the inflow of abundance** into our life from the divine Kingdom is diminished, and we become 'prodigal sons' left to **fend for ourselves** in the vast materialistic words.

The looking glass reflects the images of single phase of the surroundings. We have to change the angle of the looking glass to get images of the other phases.

Our mind is also a one-sided subtle 'looking glass' which takes only the **images of this materialistic** world and forms ideas, thoughts, opinion which in course of time become beliefs, convictions and faith.

By constantly:

Seeing

Observing

Thinking

Dwelling

Contemplating

on the illusive phase of his **materialistic world** of 'Maya' during so many lives, we have become **unaware, ignorant or forgetful** of the higher, sublimer Real World of God's Kingdom.

It is, therefore, obvious that if we **want** to realize the real Divine Kingdom, we will have to **change, redirect and divert our mind and thoughts** from the present materialistic phase. But this process of diversion and transformation of our mind, thoughts and consciousness is possible only in the magnetic field or 'aura' of Enlightened and Blessed Souls, who live in the Divine Kingdom and enjoy the Grace and Love of the Lord.

The human beings, with all the weakness and propensities of being influenced by the powerful gravity of 'Maya', in the darkness of egoistic illusion, are unable to aspire for, or try to undertake the task of changing or reversing the process of their consciousness **by themselves.**

In other words, a 'Man of Faith', i.e. an Enlightened and Blessed Soul is required to inspire and re-ignite our latent Faith in the Divine Power, and Grace. Thus, the Reverse Process of re-orientation or transformation of our consciousness can be initiated, sustained and developed by constant inspiration in the company of 'Men of Faith', i.e. Illuminated souls. The newly inspired and ignited soul is then ushered and re-admitted into the Divine Kingdom, and becomes 'Beloved Son' of God, enjoying all the happiness, powers, bliss, joy and love of Divine Kingdom. His 'egoistic self' is re-oriented, transformed and transmuted into the 'Divine Self', and he is no longer troubled with materialistic causal desires and ambitions.

He is invested with all the attributes and powers of the Divine Kingdom by virtue of his '**spiritual inheritance**' as a 'Son of God'. If necessary, he uses these spiritual powers in response to the dictates of his 'inner self', for the good of the universe.

He becomes a tiny pinion in the vast drama of the cosmos to carry on his assignment with selflessness and dedication. He works for 'Thee' and 'Thine', in conjunction, and in tune with the Divine Will. It becomes his 'Loving Service' **offered to the Lord** with humility and devotion.

In this sublime spiritual consciousness, **God's Grace** and love becomes '**self-sufficient**' to:

- provide all the needs of the soul in **abundance**;
- nurse the souls with the motherly tender care;
- protect and sustain the soul in the illusive world of Maya;
- solve all kinds of problems;
- eliminate all the sufferings and miseries;
- bless the soul with the Divine Gifts of peace, happiness, joy and bliss;
- bask in the cosy sunshine of Divine Effulgence;
- free the soul from the clutches of 'Karmic Law';
- enjoy the sweet grace and love in the lap of Divine Mother.

Such Enlightened and Blessed souls become desire-less and contented, and are lost in the ecstasy of **humility and thankfulness** for all the Divine Blessings and Gifts showered on them by the Grace and Love of the Lord.

Having been admitted into the Divine Realm, the soul becomes

a member of the Genuine Spiritual Brotherhood and Sisterhood, and is endowed with all the attributes and powers of Divinity. Thus it holds the whole cosmos in its palms!
